

FAQ – Amezcua Bio Disc

1. What is the Amezcua Bio Disc?

The Amezcua Bio Disc is made of technically engineered natural minerals which have been structurally bonded in glass, at molecular level, using high heat fusion methods. This combination of minerals and fusion techniques creates a positive energy field.

The Amezcua Bio Disc has been evaluated by various institutions and is known to reduce the water surface tension value. This in turn makes the water more hydrating and improves the transfer of nutrients in and out of the water cells and the nutrient uptake.

As evaluated by I.H.M institute in Japan, Water treated with the Amezcua Bio Disc produces more beautiful and good water crystals, an indication of good quality and energy level of water.

Various test results also reveal that the Amezcua Bio Disc can increase the energy and harmony levels in users who use the disc or drink the water treated with it.

2. What is the Amezcua Bio Disc made of?

Technically engineered natural minerals are fused and structurally bonded together at a molecular level using several high heat fusion methods. The combination of the minerals and the fusion techniques produce a catalytic conversion of energy, developing a long lasting natural resonance.

3. How does it work?

The 'beta' rhythm frequency spins in an anticlockwise direction and like other energy wave forms, can 'influence' inert objects. For instance a magnetic field can influence metal objects and x-ray can influence film strip. Likewise, beta rhythms at the correct frequency and spin velocity can influence liquid.

4. Is there any expiry date?

We expect the Amezcua Bio Disc energy to last 15 years as recent tests on the original reproduction test units made five years ago show that they have increased in energy levels. Unlike a magnet the resonance is not affected by the earth's gravitational pull.

5. What are the easy ways to test that the energy level is present and effective?

a simple way is to use the taste buds, visual and other sensitive body sensors as follows:

- i) Slice up a lemon and lime
- ii) Pour liquor or wine into two glasses
- iii) Place one slice of the lemon and lime on the Amezcua Bio Disc

- iv) along with ONE of the glasses of wine or liquor
Stand the duplicate items 5 metres away from the Amezcua Bio Disc
- v) Allow 20 minutes to elapse
- vi) Visually check the cell structure of the fruit. The slices on the disc will look fresher and younger. Smell the liquor or wine. The one of the Amezcua Bio Disc will smell softer and sweeter
- vii) Taste the fruit samples from the disc. They should taste fresher, less acidic and sweeter than the original samples placed five metres away from the disc

6. Do you have any international organization approve or recognize the Amezcua Bio Disc?

The Amezcua Bio Disc is based on the facts and theories of Quantum Physics. The Amezcua Bio Disc has been evaluated by various institutions and is known to increase the energy and harmony levels in users who use the disc or drink the water treated with it.

As evaluated by I.H.M institute in Japan, Water treated with the Amezcua Bio Disc produces more beautiful and good water crystals, an indication of good quality and energy level of water.

Various test results also reveal that the Amezcua Bio Disc can reduce the water surface tension value. This in turn makes the water more hydratious and improves the transfer of nutrients in and out of the water cells and the nutrient uptake.

7. Do you have any lab test results proving that the Amezcua Bio Disc works?

The Amezcua Bio Disc has been evaluated and certified by the following institutions:

Evaluator	Country	Scope
I.H.M. Institute	Japan	Water crystal photography and energy levels in water
Dr. med. Manfred Doepp	Germany	Energy levels in water and human body
PSB Laboratory	Singapore	Water surface tension value
PROGNOS, MedPrevent GmbH & Co	Germany	Positive energy field
SCHOTT AG	Germany	Manufacturer of bio disc glass

8. How far can the energy transfer?

The energy field is measurable 70 metres vertically up and down and 20 metres in circumference.

9. What is the coverage area?

The effective field of change is 5 square metres.

10. What is the difference between the Amezcua Bio Disc and Water filtration Treatment Systems or Oxygenated Water?

The systems mentioned are in the main filtration systems that sanitize and sterilize water. The disc does neither. It simply adds a positive energy into your chosen drinking water. It can make as much or as little as required it is used in addition the filtration systems and is not meant as a replacement. The Amezcua Bio Disc also positively effects food, fruit and plants.

11. Do you have any testimonials for the Amezcua Bio Disc?

Please refer to testimonials from our customers on the website – www.amezcua.com
